

Argyrios Gerostergiou

Software Engineer in Test

argirisgerost@gmail.com | [linkedin.com/in/argiris-gerostergiou](https://www.linkedin.com/in/argiris-gerostergiou)

PROFILE

Software Engineer in Test with around five years of experience making software more reliable across both the front-end and back-end. I cover the full quality lifecycle, from analysing requirements and defining clear test scenarios in Jira to designing the automation that keeps them running on every change. Back-end testing in C# with xUnit (integration, contract), isolation with Moq and WireMock, and containerised, scenario-based suites with Podman, databases and RabbitMQ; front-end component testing with Playwright and TypeScript.

EXPERIENCE

Software Engineer in Test

Apr 2026 – Present

Kaizen Gaming · Full-time

- Promoted from Junior Software Engineer in Test, continuing to drive quality across front-end and back-end testing.

Junior Software Engineer in Test

Jan 2024 – Apr 2026

Kaizen Gaming · Full-time

- Used Jira for ticket management, ensuring seamless coordination and tracking throughout the sprint process.
- Performed Test Analysis in Jira, defining scenarios with precise preconditions, steps, and expected results.
- Built Integration Tests in C# / xUnit to validate endpoint functionality.
- Built Contract Tests in C# / xUnit to ensure endpoint contracts are never broken during development or deployment.
- Used the C# Moq library and WireMock to mock endpoint requests/responses, enabling isolated automated tests.
- Used C# and Podman to run automated tests in containerised environments with databases and RabbitMQ for scenario-based, isolated testing.
- Built Component Tests with Playwright & TypeScript to validate component functionality.
- Used Git for version control and GitLab to create and review merge requests, ensuring code quality.
- Participated in the full Scrum cycle: stand-ups, refinements, planning, reviews, and retrospectives.

Junior Software Engineer in Test

Jan 2022 – Jan 2024

Dataverse Ltd · Full-time

- Developed the automation framework from scratch based on C# and Selenium.
- Maintained the framework to ensure its stability, scalability, and effectiveness.
- Led the test automation engineering team as the informal manager.
- Trained new team members on the automation framework, tools, and testing workflow.
- Reviewed team members' automation code for the test cases.
- Used Redmine to create issues and report bugs, and TestRail to create, analyse, and update test cases.
- Used Postman for API testing, Git for version control, and the Scrum process for Agile development.

Junior Software Engineer in Test (Internship)

Jul 2021 – Jan 2022

Dataverse Ltd

- Started building hands-on test automation experience that led to a full-time role.

EDUCATION

Bachelor's Degree in Computer Science

University of Thessaly

Sep 2014 – Nov 2022

SKILLS

Languages: TypeScript, C#, SQL

Testing Types: Test Analysis, Component (FE/BE), Integration, Contract

Test Automation: Selenium, Playwright, xUnit, WireMock

CI/CD, Infra & Tools: Git, GitLab, Podman, RabbitMQ, Jira, TestRail, Redmine, Postman, Scrum/Agile

CERTIFICATIONS

Certificate of Competency in English — University of Michigan · May 2011

ISTQB® Certified Tester Foundation Level (CTFL) — Nov 2022 · Credential ID GRTB-22-CTFL-1073

Google AI Essentials — Kaizen Gaming · Feb 2026

Anthropic Academy — Jun 2026 · Claude 101, Claude Code 101, Claude Code in Action, AI Fluency: Framework & Foundations, Introduction to Agent Skills, Introduction to Subagents, AI Capabilities and Limitations
